

TANISHA AGARWAL

Python Developer | Flask & Backend Development | AI-Powered Applications

agarwalt693@gmail.com | [LinkedIn](#) | [GitHub](#) | Pune, India

PROFILE

MCA student and Python developer with a focus on Flask-based web development and applied machine learning. I've built several projects end-to-end — including TripTactix, a travel planning platform with booking workflows and AI recommendations — and completed a 7-month internship in web analytics and reporting. I'm looking for a role where I can keep learning while contributing to real product work.

EXPERIENCE

Web Intern | Prop Innovations and Solutions, Pune | Aug 2025 – Mar 2026

- Conducted competitor analysis and usability testing to identify design improvements and UX gaps.
- Tracked website performance metrics using analytics tools and produced structured reports for product decisions.
- Identified and documented bugs across feature releases, improving website quality before deployment.

PROJECTS

TripTactix — Smart Travel Planning Platform — *Python · Flask · Jinja2 · AI*

- Built a Flask-based travel platform with personalised trip recommendations based on user budget and preferences.
- Designed booking and itinerary workflows — trip selection, payment simulation, and travel planning features.
- Integrated AI-assisted recommendations; implemented backend logic, dynamic rendering, and modular routing.

AgroConnect — Farmer-Buyer Marketplace — *Python · Flask · MySQL*

- Developed a platform connecting farmers with buyers — product listings, search, and order management workflows.
- Designed the database schema and user role logic; built an accessible UI for non-technical users.

Resume Analyzer — *Python · Flask · Generative AI*

- Built an AI-powered tool that parses uploaded resumes and returns structured feedback on content and keyword gaps.

Student Performance Predictor — *Python · Scikit-learn · SVM · Flask*

- End-to-end ML pipeline — data cleaning with Pandas/NumPy, SVM training, and multi-algorithm comparison.
- Visualised results with Matplotlib/Seaborn; deployed predictions via a Flask web interface.

TECHNICAL SKILLS

Languages: Python · MySQL · SQL · HTML · CSS

ML & Data: Scikit-learn · Pandas · NumPy · SVM · Data Cleaning · EDA

Web & AI: Flask · Jinja2 · REST APIs · Generative AI · Prompt Engineering

Tools: Jupyter Notebook · Git · VS Code · Matplotlib · Seaborn · Excel

EDUCATION

Master of Computer Applications (MCA) | Pimpri Chinchwad University, Pune | 2024 – 2026

CGPA: 8.66

Bachelor of Computer Applications (BCA) | ICCS, Pune | 2021 – 2024

CGPA: 9.2

CERTIFICATIONS

Machine Learning · Generative AI · Python Programming — Coursera

LANGUAGES

Hindi — Native · English — Fluent
