

TANISHA AGARWAL

Python Developer | Flask & Backend Development | REST APIs

agarwalt693@gmail.com | LinkedIn | GitHub | Pune, India | Portfolio

PROFILE

MCA graduate and Python developer specializing in Flask-based backend development and REST API design. Built multiple end-to-end web applications — including TripTactix, a travel booking platform, and AgroConnect, a farmer-buyer marketplace — with a solid foundation in database design, server-side logic, and application architecture. Completed a 7-month internship supporting web analytics and reporting. Seeking a backend/full-stack developer role to build production software.

EXPERIENCE

Web Intern | Prop Innovations and Solutions, Pune

Aug 2025 – Mar 2026

- Built structured, data-backed reports from website performance metrics to support product decisions.
- Conducted competitor analysis and usability testing, feeding findings into design and feature improvements.
- Identified and documented bugs across feature releases, coordinating fixes ahead of deployment.

PROJECTS

TripTactix — Smart Travel Planning Platform — Python · Flask · Jinja2 · AI

- Built a Flask-based travel platform end-to-end, including trip recommendation logic, booking workflows, and dynamic itinerary rendering.
- Designed backend routing, modular application structure, and a payment-simulation workflow.
- Integrated AI-assisted recommendations driven by user budget and preferences.

AgroConnect — Farmer-Buyer Marketplace — Python · Flask · MySQL

- Developed a Flask + MySQL marketplace connecting farmers with buyers, with listings, search, and order management.
- Designed the relational database schema and role-based access logic; built an accessible UI for non-technical users.

Resume Analyzer — Python · Flask · Generative AI

- Built a Flask application that parses uploaded resumes and returns structured, keyword-based feedback using generative AI.

Student Performance Predictor — Python · Scikit-learn · SVM · Flask

- Built an end-to-end ML pipeline — data cleaning, SVM training, multi-algorithm comparison — with a Flask interface for live predictions.

TECHNICAL SKILLS

Languages & Backend: Python, Flask, REST APIs, SQL, MySQL, HTML, CSS, Jinja2

Tools: Git, VS Code, Jupyter Notebook, Excel

ML & Data: Pandas, NumPy, Scikit-learn

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Pimpri Chinchwad University, Pune | CGPA: 8.66

Bachelor of Computer Applications (BCA)

2021 – 2024

ICCS, Pune | CGPA: 9.2

CERTIFICATIONS

Python Programming · Machine Learning · Generative AI — Coursera

LANGUAGES

Hindi — Native · English — Fluent
